
Job Title:	Network and System Administrator	Location:	Lausanne, Switzerland
Type of job:	80% or Full time	Start Date:	As soon as possible
Ref:	10000		

In order to strengthen its core engineering team, NEXThink S.A., a Swiss-based fast-growing venture with a patented and award-winning technology for Enterprise Desktop Monitoring is looking for a

Network and System Administrator

This position entails high levels of responsibility in NEXThink's IT organization. Your contribution will have a direct impact on the IT infrastructure and organization that is used by every employee of the company.

Key Responsibilities

- Infrastructure:
 - Setup, organize and maintain the low level infrastructure (e.g., network, VPN, DNS, ...)
 - Buy, install and maintain the different production/test servers and PCs
- Services:
 - Setup and maintain the different services/softwares (e.g., mailing system, backup policy, integration servers, versioning systems, ..)
 - Implement and fix low-level scripts (e.g., sh, php, lua, ...)
- Support:
 - Take care of the IT policy (e.g., security, accounts creation and removal, ...)
 - Configure new PCs for the employees
 - Help people to fix their computers or with software problems

Qualifications

- Outstanding skills in Linux administration (Debian, CentOS)
 - Firewall, DNS, reverse proxy, VPN, SMTP, Samba, ...
- Very strong skills in Windows administration (Windows Server 2008)
 - Active Directory, GPO, DNS, Windows Domain Firewall, SCCM, SCOM, ...
- Strong skills in virtualization software administration (Hyper-V, vCenter, ...)
- Strong motivation to install and maintain new softwares (e.g., Jira, trac, svn, ...)
- Knowledge in virtualized environments (e.g., Citrix, Terminal Services, ...) is a plus
- Excellent communication and teamwork skills
- Professional-level English spoken

We offer

- An opportunity to take over the entire IT infrastructure of a growing, multinational and first-class software company
- Very competitive salary and social conditions
- An enterprise culture focused on technical excellence and creativity
- Projects using cutting edge technologies and tools
- Ideal working conditions on EPFL's campus near the lake

How to apply

Please send your application letter and resume via e-mail to sebastien.baehni@nexthink.com

Enterprise Desktop Monitoring

NEXThink S.A. is a Swiss-based fast-growing high-tech venture founded in 2004. NEXThink's core technology, based on research initially conducted at the EPFL Artificial Intelligence Laboratory, helps to discover what is really going on in corporate networks and to understand both application and user behaviours, to manage change and ensure the right applications and quality of service to end-users.
